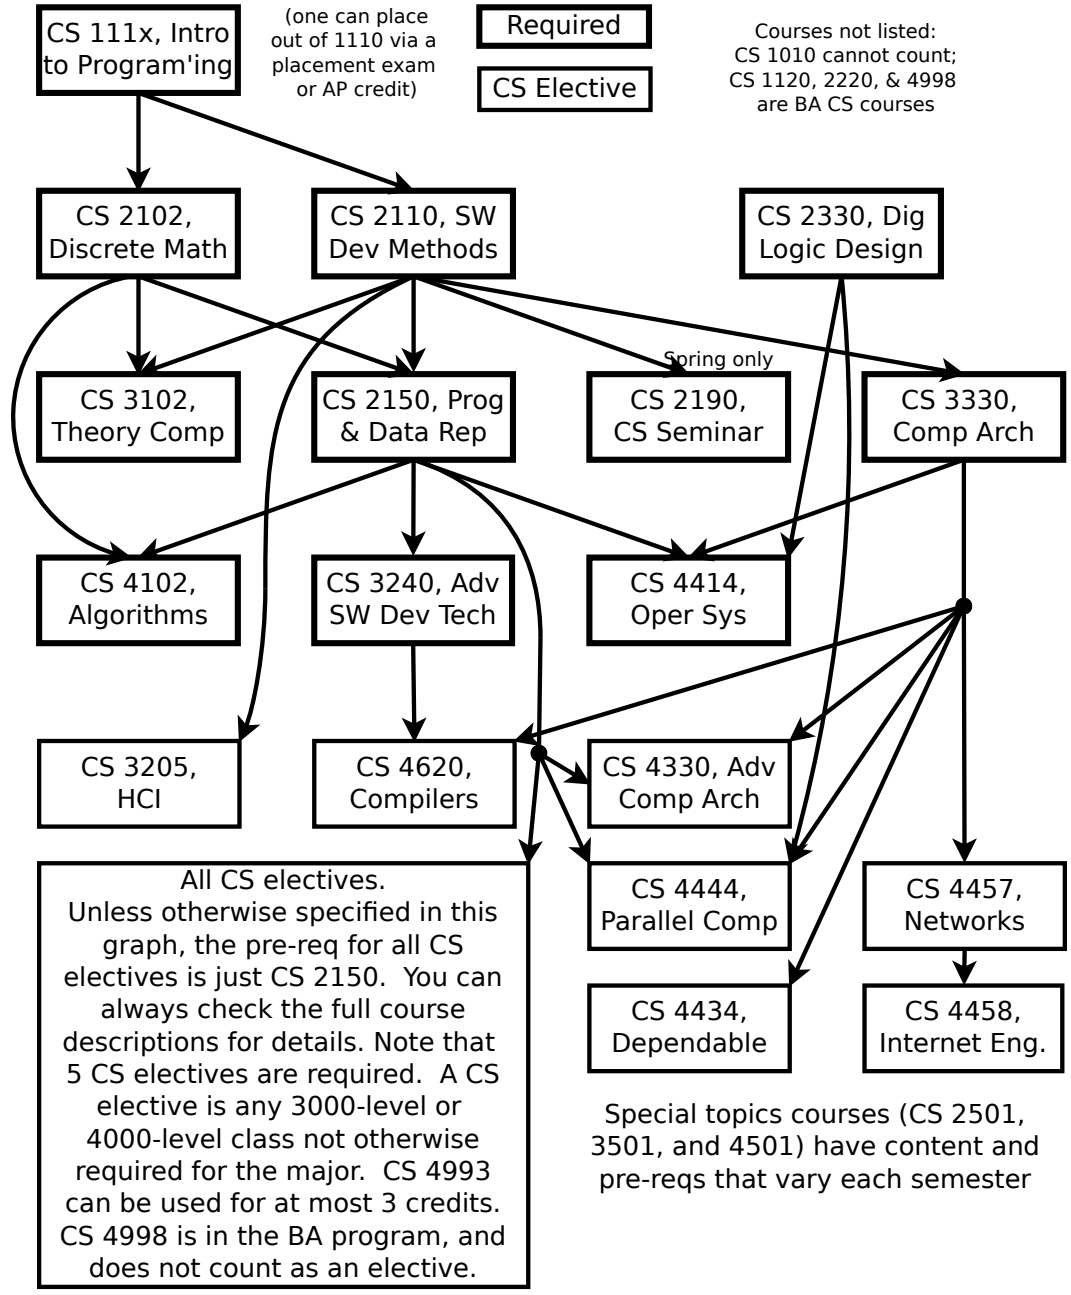
Course Requirements Flowchart

(Updated October 2013)



Note that ECE 4440 can also count as a CS elective, but its pre-req is ECE 3430 (which does NOT count as a CS elective). These two courses are in the Computer Engineering curriculum, and are not shown here.

Students must take one capstone course (CS 4971 or CS 4980) to fulfill the capstone requirement; note that CS 4970 (which counts as a CS elective) is a strict pre-req for CS 4971.
